SUMMARY

I'm fascinated by technology and the power it has to transform people's lives. I have 1 year's experience in Front End Development and I'm always learning and evolving. I have experience and skills in the following technologies: React (Context API and Hooks), NextJS, Typescript, CSS, HTML, PostgreSQL, Node, TypeORM, Styled-Components, Chakra UI and JEST.

EXPERIENCE

YOUDevelop

Web Developer - April/2022 – Oct/2023:

I work on the implementation and maintenance of projects for third-party companies using Agile Methodologies and technologies such as: *React, NextJS, Typescript, Styled-Components and Firebase.*

LocalSIG

Web Development Trainee– Feb/2022 - May/2022:

I worked on the company's mobile and web development. From creating prototypes in Figma to implementing React Native for mobile and React with NextJS on the web. I also had experience developing websites using Wordpress and Elementor PRO.

PROJECTS

Ignews | <https://ignews-gabriel0.vercel.app>

Platform focused on managing user subscriptions for access to reading blog articles

- Integration with Stripe API for monthly payment method;
- Integration with the Prismic API, a CMS for creating articles;
- Using JEST for unit tests;
- Storing user data and their subscription using FaunaDB..
